# Rise above average

A cleaner, smarter way to feed modern plants.

Uniform mineral nutrition developed by cultivators and lab specialists.

E Y V A

Designed for modern LED cultivation

# Powders

Efficient mineral nutrition designed for consistent performance.

EYVA powders remain loose and uniform throughout the entire bag, enabling precise dosing and clean nutrient solutions.

Their concentrated mineral formulation delivers excellent value per grow and efficient feeding at any scale.

Compatible with both manual mixing and automated dosing systems.

Base / Grow / Bloom

# Liquids

Professional performance in a familiar format.

EYVA liquids deliver the same balanced mineral nutrition in an easy measure-and-pour system.

Clean mixing, stable feeding and a straightforward routine for growers who prefer liquid programs.

Grow A / Grow B / Bloom A / Bloom B

# Additives

Precision support where plants need it most.

EYVA additives complement the base system with targeted support for strength, balance, flower development and finish.

Use them to refine the cycle without complicating the overall program.

Silica / FlowerBoost / CalMag / Flush
